

BENJAMIN BONNELL

757-218-6921 | benjaminleebonnell@gmail.com | Harrisonburg, VA | benjaminbonnell.github.io

EDUCATION

Virginia Tech | Alexandria, VA | August 2026 - May 2027 (Expected)

M.Eng, **Computer Science**: Software Development & Applications

James Madison University (JMU) | Harrisonburg, VA | August 2022 - May 2026

B.S. **Computer Science** | Minor: **Industrial & Manufacturing Systems** | **3.51 GPA** - Cum Laude

WORK EXPERIENCE

Project Intern | **E. E. Reed East Coast** | Herndon, VA | May 2026 - August 2026

- Built and deployed a MS PowerApp to track 200+ food truck meal tickets per day into a SharePoint database, with Excel summary and daily email powered by Power Automate.
- Communicated with subcontracting companies to ensure synchronization between field work and plans.

Student IT Assistant | **JMU CSM** | Harrisonburg, VA | January 2024 - May 2025

- Coordinated with staff to effectively deploy and maintain workstations and servers across JMU campus.
- Managed robust inventory system for JMU's east campus academic buildings and offices.
- Wrote custom software scripts to automate remotely checking device status & connectivity.

PROJECT EXPERIENCE

Stock Keeping Unit Lookup Tool | Fall 2025

- Developed an internal tool for a private company that uses various string-matching algorithms to accurately parse customer data and output it in accordance with internal company standards.
- Used Claude AI to generate HTML frontend elements, layout, and string matching algorithm functions.
- Saves company employees 10-40 minutes on average per customer order.

WebGL Video Game | Fall 2025

- Created a Frogger-style web-based platformer game from scratch with TypeScript and WebGL.
- Wrote a 3D graphics engine from scratch, implemented a library in TypeScript to draw complex mesh models with support for shaders.
- Modeled and textured all 3D game assets in Blender with animations built from motion-capture data.

RimpleX Complex Number Calculator | Spring 2025

- Built a complex number calculator with Java & Swing GUI in a simulated software engineering environment.
- Worked in a team of engineers under a lightweight framework, conducted successful meetings and negotiations with the project manager.
- Used SCRUM process framework to delegate tasks, review progress, and handle sprints.

SKILLS

AI Assisted Development, Claude Code, ChatGPT, Agentic AI, SCRUM, Git, Python, Java, JUnit, JavaScript, TypeScript, C, HTML, React, Linux, Code Review, Project Presentations, WebGL, CAD, Object Oriented Programming, UI/UX

Relevant Coursework: AI Tools for Software Engineering, Software Engineering, Ethics & Professionalism in Computer Science, Advanced Programming, Computer Systems I & II, Full Stack Application Development, Data Structures & Algorithms, Applied Algorithms, Computer Graphics, Programming Languages
